🐙 Github

Full Stack Developer with **2.5+ years of experience** building scalable, production-grade web applications using the **MERN stack**. Delivered real-world impact across **space analytics, blockchain, and AI domains** — including a marine intelligence platform that helped secure market funding. Skilled in **REST API design, real-time systems (WebSockets), RBAC security, GIS integrations, and multi-provider satellite data platforms**. Writes clean, maintainable code and thrives in fast-paced product environments.

🔧 Technical Skills

- **Languages:** JavaScript (ES6+), HTML5, CSS3
- **Frontend:** React.js, Redux Toolkit, RTK Query, Tailwind CSS, Material UI, Chakra UI, Bootstrap, GSAP, Framer Motion
- **Backend:** Node.js, Express.js, REST API Development, WebSocket
- **Databases:** MongoDB, Mongoose
- **Security & Auth:** JWT, HTTP-only Cookies, RBAC, Password Hashing, Session Management (auto-logout, concurrent sessions), Joi Validation
- **Tools:** Git, GitHub, Postman, VS Code, Figma
- **Core Concepts:** MERN Stack Development, RESTful API Design, API Integration, State Management, Responsive Design, Authentication & Authorization, CRUD Operations, Performance Optimization, Scalable Application Architecture, Error Handling, Asynchronous Programming, MVC Architecture, GIS / Geospatial Systems, OpenAI API Integration (GPT + DALL-E).

📁 Experience

» **Full Stack Developer**, Suhora Technologies – Noida, UP Aug 2024 – Present
Space Analytics Simplified | React.js, Node.js, WebSockets, GIS Tools

- **Unified Geospatial Intelligence Dashboard:** Developed a centralized dashboard that consolidated satellite imagery from multiple providers into a single platform. Built interactive modules for imagery management, order tracking, and geospatial analytics, enabling users to efficiently monitor and manage data without switching between vendor portals.
- **Real-Time Maritime Monitoring:** Engineered real-time ship tracking and detection dashboards using WebSockets and GIS technologies. Integrated live vessel positions, historical tracks, and AI-based ship detection results on interactive maps, delivering a seamless monitoring experience with low-latency updates.
- **Role-Based Access Control & Secure Authentication:** Implemented a robust RBAC system using JWT authentication, HTTP-only cookies, and protected routes to provide customized dashboards based on user roles. Enhanced application security by restricting sensitive operations and ensuring secure session management.
- **Interactive Analytics & Dashboard Optimization:** Designed responsive dashboards featuring dynamic charts, advanced filtering, and geospatial visualizations for operational insights. Improved frontend performance through reusable React components, lazy loading, API optimization, and efficient state management, resulting in a faster and more scalable user experience.

» **Full Stack Developer**, Matrix Labs – Remote Jan 2024 – Aug 2024
Blockchain-Based Platform | React.js, Node.js, Express.js, OpenAI API, Firebase, GSAP, Framer Motion

- **AI Image Generation:** Built a full-stack **text-to-image app** integrating **OpenAI DALL-E and GPT APIs**; implemented Firebase storage for generated images and a clean gallery interface for retrieval.
- **Blockchain / Web3:** Managed **smart contract configuration and crypto wallet connection** flows, enabling seamless on-chain interactions for end users.
- **Animated UI:** Delivered complex **micro-interaction animations** using GSAP and Framer Motion, raising the product's visual quality and user engagement.
- **Backend Auth:** Architected complete **authentication and authorisation** layer in Node.js — JWT, password hashing (bcrypt), and role-based access — securing all API endpoints.

» Full Stack Developer (Trainee), Masai School – Bengaluru (Remote)

2022 – Nov 2023

Intensive 9AM–9PM Industry Curriculum | MERN Stack, REST APIs, JWT, SPA Development

- Built **multiple production-style projects from scratch** — e-commerce SPAs, REST API servers, and auth systems — covering the full development lifecycle end-to-end.
- Implemented core engineering patterns across projects: **JWT authentication, bcrypt password hashing, protected routing, REST API integration, CRUD operations**, and responsive design with modern CSS frameworks.

Education

Masai School, Full Stack Web Development

2022 – 2023

Shri Varshney College, B.Sc. in Computer Science

2019 – 2022
